Cari motioned to approve the tool packages and the tool distribution list that Michele and Kyle created. Greta Seconded the motion  
All in favor, no oppose

**Tool Package Detail** - Below is what Kyle and I came up with. We can discuss this further on Tuesday and vote on it. In the mean time, let us know if you have any questions.

**TOTAL PACKAGES** - We put a total of 18 packages together. 14 regular packages together (6-8 tools per package with an average value of \$805)

**PROFESSIONAL GRADE PACKAGES** - We put a total of 4 professional grade packages together (9- 11 tools per package with an average value of \$1,249). We had more potential recipients for this level of tool package (based on what they reported they lost) but we choose to go with the families that had no insurance. The others had CA Fair Plan. The families receiving the professional grade tools are highlighted in Pink in the below Google sheet. The families in Blue highlight we considered for professional tools but they have the CA Fair Plan so they are receiving tools but not the professional grade packages. Although the CA Fair Plan sucks, we were able to use this factor to whittle the list down to 4 families.

**WHO WAS LEFT OUT:** We have identified the list of tool recipients and our list has 21 people (we are giving out 18 sets) so we choose them in order of us receiving their application. The three families who got in their applications in March, we are giving smaller packages to. They are highlighted in Yellow. We also excluded all those folks who have private insurance and who lost a 2nd home.

**PREVIOUS ROS DISTRIBUTION RECIPIENTS:** 9 of the 18 families receiving tools have received our \$1317 distribution. That is because they lost their primary residence and had no insurance. The 5 others have the CA Fair Plan and that's why they haven't received a distribution from us.
